

MT1

AI Powered Robotic Sweeper

The MT1 is the world's first AI powered sweeping robot designed for large-scale commercial and industrial environments. It detects, recognizes and sweeps all types of debris through AI deep learning and database updates. With cleaning results rivaling ride-on sweepers, it enables 24/7 autonomous operation, setting a new standard in automated facility cleaning.

No Debris Too Big or Small

AI Trash Recognition

AI Spot Cleaning

Rapid Adaption to
Changing Environments

24/7 Continuous
Operation

User-Friendly Design

Effortless Smart Cleaning

Designed for Big Venues

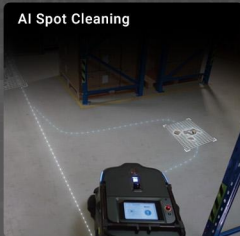

No Debris Too Big or Small

AI Trash Recognition

AI Spot Cleaning

Active Dust Control
