

Robotic Solutions for Campus

Our integrated robotic solutions help educational facilities automate time-consuming maintenance tasks like floor cleaning and turf care

FLOOR CARE

CC1

Multipurpose Floor Cleaning Robot

Used daily by large convenience store chains, hospitals, schools, hotels and other facilities, our customers love the CC1 for its versatility, nimble size, and reliable cleaning power. Pays for itself in 6 months – 1 year depending on usage!

- Covers up to 8,000 ft²/hr
- Vacuum, mop, scrub, sweep
- Fast and simple maintenance
- Use on hard floors and low-pile carpet
- Switch between functions with one click
- Auto workstation included to charge, dump & refill water

SH1

Smart Upright Scrubber Dryer

SH1 is ideal for complex or greasy environments not suitable for larger units. Great for use in restrooms, commercial kitchens, and complex/crowded food service layouts.

- Reduces cleaning time by 70%
- Combines the power of a walk-behind scrubber dryer with the ease of a mop
- Ideal for greasy environments or complex food service layouts
- 9 different cleaning modes for multi-surface cleaning

FLOOR CARE

FLOOR CARE

TN70

Disc Brush Floor Cleaning Robot

Built for high-traffic environments, the TN70 delivers powerful scrubbing, suction, and filtration for deep cleaning with minimal labor.

- Cleans up to 22,000 ft²/hr
- 20" disc brush for cleaning and polishing
- 32" squeegee width
- 3 hr continuous scrubbing/10 hr dust mop

OUTDOOR AND TURF CARE

MT5

Indoor-Outdoor Autonomous Sweeper

This autonomous sweeper for large indoor and outdoor spaces simplifies campus and grounds maintenance with rugged, unstoppable cleaning power.

- Cleans up to 32,000 ft²/hr
- Cleans hard flooring, asphalt and concrete
- Large debris sweeping in outdoor environments including parking lots and sidewalks
- GPS enabled for accurate positioning in almost any environment

RM21

Autonomous Robotic Commercial Lawn Mower

Take campus turf care to a new level with fully-autonomous, all-electric, professional-grade mowing.

- Large-scale commercial mowing power
- Cuts long or wet grass easily with no clogs
- Climbs slopes of up to 20° without getting stuck
- Advanced navigation, cloud-based 3D mapping, and autocharging
- Can cover 23 acres/3 days without human intervention
- Line marker, grass collector, dew brush, ball picker attachments available

OUTDOOR AND TURF CARE

OUTDOOR AND TURF CARE

Z42P

Smart Professional Robotic Lawnmower

The Z42P offers a smart and cost-effective solution for professional turf management, making lawn care easier and more efficient.

- Professional-grade robot mower with autonomous and manual capability
 - Optional ball collection attachment for golf course
- AI path planning + LiDAR enable mowing in areas with weak RTK signals
 - Electric only + extended range options

RLM01 PaintMaster Pro

Robotic Line Marker

A truly intelligent line-marking robot for athletic fields delivering centimeter-level accuracy and significant time savings.

- Two industrial-grade GNSS positioning systems and a local base station
- Optional laser kit for millimeter-level marking precision even in GPS-challenging areas
- Lightweight and portable design + independent paint filling port for ease of use
- Advanced vision systems deliver safe and consistent performance even at night
